

Urology Examination Table

UROGRAPH

The urology examination table is versatile and thanks to its simple construction, it is completely trouble free whilst handling. This examination table can be tilted and moved vertically. The table top is longitudinally and transversally adjustable. The functional disposition of the components enables an unhindered access to the patient from all sides.

The Bucky diaphragm is provided to mount a 7" or 9" image intensifier.

Focus-film distance (fix)	110 cm
Motorized height adjustment of the examination table	70 ... 110 cm
Tilting angles	- 20° ... 0° ... + 90°
Table top lateral displacement travel	54 cm
Table top longitudinal displacement travel	+/- 10 cm
